Louisville, CO – Among likely general election voters in the 7th Congressional District of Colorado, Republican candidate Ryan Frazier has a one point lead over Democrat Congressman Ed Perlmutter, 40% to 39% respectively. Ten percent of voters support “another candidate” and 11% are undecided. The ballot test results are based on an automated survey of 830 likely general election voters in the 7th Congressional District fielded Thursday, August 26th. This survey has a margin of error of +/- 3.4% at the 95% confidence interval. Ryan Frazier has an 8 point lead among male voters and Ed Perlmutter leads by 4 points among women. Among the key voting subgroup of unaffiliated voters, Ryan Frazier leads by 10 points, 37% to 27%. The following table shows the ballot test by significant voter subgroups.

Ryan Frazier Image Rating

“Do you have a favorable or unfavorable opinion of Ryan Frazier?”

Despite name recognition of only 60%, Ryan Frazier is in a statistical tie with incumbent Ed Perlmutter. This is a reflection of the anti-incumbent, anti-Congress mood that is prevalent across the country. Ryan Frazier’s image ratio is 2 to 1, with 22% of voters having a favorable opinion of him and 11% having an unfavorable opinion. Twenty seven percent of voters have heard of Ryan Frazier but do not have an opinion of him.

Ed Perlmutter Image Rating

“Do you have a favorable or unfavorable opinion of Ed Perlmutter?”

Among all voters, 37% have a favorable opinion of Congressman Ed Perlmutter and 39% have an unfavorable opinion of him. This puts his image ratio at slightly worse than 1 to 1, which is considered “uncomfortable” for an incumbent. Ideally, a strong incumbent will have a positive image ratio of 3 to 1, (60% favorable, 20% unfavorable). Among unaffiliated voters, his image rating is 30% favorable and 41% unfavorable, slightly upside down.

Nancy Pelosi Image Rating

“Do you have a favorable or unfavorable opinion of Nancy Pelosi?”

The face of the Democrat Congress, Speaker Nancy Pelosi, has a negative image rating of 1 to 2, with only 28% having a favorable opinion of her and 61% having an unfavorable opinion. Among her own base, Democrat voters, 57% have a favorable opinion of her and 28% have an unfavorable opinion. Among the vital subgroup of unaffiliated voters, only 16% have a favorable opinion of her and a whopping 68% have an unfavorable opinion of her.

Voter Federal Issue Priorities

Among all likely voters, 51% believe creating jobs and growing the economy is the top issue priority that Congress and the Federal Government should be addressing the most. The second top issue priority is controlling government spending, with 14% of likely voters responding that should be the top priority for Congress. Illegal immigration reform was the third priority, with 13%.

Ed Perlmutter Job Approval

“Do you approve or disapprove of the job Ed Perlmutter is doing as your Congressman?”

Among all voters, 36% approve of the job Ed Perlmutter is doing and 40% disapprove. Although these are not great numbers for an incumbent, it could be worse for Ed Perlmutter considering the negative mood of likely voters, with 65% of voters thinking things in the country are off on the wrong track. Looking at the responses by voter subgroup, only 29% of unaffiliated voters approve of the job Ed Perlmutter is doing and 43% disapprove, a 14 point gap. We project unaffiliated voters to contribute 27% of the overall vote, a significant block of voters that will have a big impact on this race.

Barack Obama Job Approval

“Do you approve or disapprove of the job Barack Obama is doing as President?”

It is apparent that President Obama is not popular in the district. Among all voters, only 39% approve of the job he is doing and 57% disapprove. The President’s job approval ratio is consistent across all major voter subgroups, with the exception of Republican voters, as seen in the table below. What is remarkable is the President’s job approval among voters aged 18 to 34, and unaffiliated voters. These voter subgroups voted overwhelmingly for Barack Obama in 2008 in the 7th Congressional District and Colorado. If voters among these subgroups are disappointed with the President’s job performance and his policies, it could very well point to a long day for Democrats on November 2nd.

Survey Methodology

This survey was conducted using automated telephone touch tone technology. The sample was randomly drawn from a Colorado voter file among households containing at least one registered voter. The response data was weighted to reflect past general election voter demographics from the 2008, 2006, 2004 and 2002 election cycles. The 830 interviews of likely general election voters were conducted on Thursday night, August 26th between 5:30pm and 8:00pm. This survey has a margin of error of 3.4% at the 95 percent confidence interval.

The survey topline results and crosstabs are included in this document.
